## CashTarget

Introducing **CashTarget**, the newest module of our **AugmentedCash** solution. **CashTarget** enables you to track, allocate and manage your collection targets at both collector and individual team level, with detailed dashboards set up to help you work towards your collections KPIs.

Allocate and monitor progress towards your cash collection targets.

Allocate targets at team level and individual collector level.

View KPIs on monthly and quarterly dashboards.

Plan for success by setting future targets ahead of time.

Set and manage cash collection targets and report on team performance easily with **CashTarget**, the newest module of the **AugmentedCash** system.

With **CashTarget**, team leaders can set collections targets to individual collectors and the entire collections team at their level. The Accounts Receivable Manager can allocate a set target to their team leaders, who are then responsible for allocating targets to their individual collectors. The dashboards work in a similar way – depending on the user's role they can either see performance towards the target at whole organization level, team level, or individual level, which helps each person in your collections team work towards a shared goal.

Performance can be measured using KPIs such as your targets, the total collectable amount, the total cleared amount, and the total amount of cash in, and users can toggle between monthly and quarterly view, to help see the full picture of your collections target and progress towards meeting it. The targets are set per Aged Bucket, so team leaders and cash collectors can accurately monitor how they are progressing towards their targets by Aged Bucket.

**CashTarget** is available as part of our market-leading **AugmentedCash** platform, which digitizes and streamlines cash collection and makes credit management easy to monitor.
